### John Deere No-Till Drill Rental Agreement

Please complete this form and mail to: LCD P.O. Box 916, Fowlerville, MI 48836

I agree to pay the Livingston Soil Conservation District a fee of \$12.00 per acre for the use of the John Deere 1590 No-Till Drill with a minimum charge of \$150.00. Payment is expected within 30 days following completion of use.

Farmers renting the drill are responsible for picking up the drill at a designated area. Please clean the drill after use.

Drill will not be transferred to another farm without permission of a representative of the Conservation District. Please notify Clark Humrich at 517-223-9971 to schedule use, and upon completion of use.

Adequate transportation is needed to haul the drill. Heavy-duty chains must be used to secure the drill on the road. The use of a 80-100 horse power tractor is recommended for field use.

Acres billed will be taken from the reading of the meter on the drill. Under no circumstances will the Conservation District be responsible for failure of a crop, or poor stand due to improper adjustment of drill or improper use by operator, nor will the District be responsible because of weather related or seed related crop failures.

Persons renting the drill will be responsible for damage due to neglect, misuse of the drill or any other damage while in the care of the renter.
